Python Course - Table of Contents

Welcome to the **Python Course**! This guide provides structured topics covering essential Python concepts.

Topics Covered:

- **Annotations & Docstrings**
  Learn how to use **type annotations** and **docstrings** to improve code readability and documentation.

- **Decorators**
  Understand **Python decorators**, how they work, and their real-world applications.

- **Exceptions**
  Master **exception handling** to write robust Python programs with `try-except`, `finally`, and custom exceptions.

Additional Resources

- Python Decorators
- Python Exceptions
- Python Annotations & Docstrings
